

## DUOPHON®

### DUOPHON®

Analogue water leak detection

The **DUOPHON®**-system is the result of a very long development and manufacture of detectors.

Its technique results out of the family of the SEWERIN-detector **AQUAPHON®**, which is used successfully worldwide for decades.

The remarkable features of these detectors are reliability, robustness and efficiency.

By developing the **DUOPHON®** additional importance was attached to low weight, compactness and easy handling.
